Available in five needle gauge and depth specifications for capillary blood sampling that's right for every test.

Unistik Touch

30G 1.5mm

Frequent blood glucose testing and paediatrics.

Box of 100: 000361

Box of 200: 000362

Unistik Touch 28G 1.8mm

Frequent blood glucose testing and other tests e.g. cholesterol and haemoglobin.

Box of 100: 000363 Box of 200: 000364

Unistik Touch

23G 2.0mm

Blood glucose testing and tests requiring larger samples e.g. INR, liver function tests, cholesterol, and haemoglobin.

Box of 100: 000365 Box of 200: 000366

Unistik Touch 21G 2.0mm

Tests requiring larger samples e.g. cardiac markers, coagulation, and blood gases.

Box of 100: 000367 Box of 200: 000368

Unistik Touch 16G (ø1.5mm) 2.0mm

Tests requiring much larger samples e.g. full menu blood gas, electrolytes, blood coagulation, total bilirubin and cardiac markers.

Box of 100: P002816 Box of 200: P002817

The appropriate device to use will depend on the blood volume required, which will vary depending on the analyser type and brand.

Sample right first time

Unistik Touch

Designed for seamless sampling

Unistik® Touch is designed to make capillary sampling as simple and seamless as possible. With one-touch activation, you simply press the device against the sample site, allowing the needle or blade to activate automatically under pressure. Once activated, the needle or blade retracts into the body of the device, minimising the risk of re-use, cross-infection and injury.

Proven Comfort Zone Technology® a comfort for patients and users

Comfort Zone Technology® minimises the pain of finger sampling^{1,2} and gives you peace of mind. When pressed against the sample site, a series of eight raised features on the platform stimulate the nerve endings. This sends a powerful message of comfort to the brain, masking the weaker pain stimulus from the needle or blade.

How to use Unistik® Touch - as simple as ABC

TWIST off and discard lancet cap. DO NOT PULL.

CLICK. Press platform firmly against sample site. After activation, the needle or blade will retract into body of device.

DISPOSE of the used Unistik® Touch in a suitable sharps container.
