Quality Policy

One Day It Might

Owen Mumford's aspiration is to delight customers through the timely delivery of safe and effective medical devices plus combination products, which are manufactured worldwide in accordance with our global documented quality system and are supported by a team that aim to exceed customers' expectations.

Quality objectives have been established to ensure we do deliver our commitments to our customers and comply with regulatory requirements¹. These objectives will be monitored and reviewed by the Executive team on a quarterly basis to maintain the effectiveness of our system and drive continuous improvement.

The medical devices and combination products we provide change people's lives. In meeting the demands of the business, its customers and end users, we should treat each part of our sales, marketing, design, manufacturing and distribution activities as if the product were to change the life of our nearest and dearest because one day it might.

Jarl Severn
